

# ELIZABETH KUNYAVSKAYA

JUNIOR JAVA DEVELOPER

+7 916 856-23-98 <https://github.com/Lilili21>

21.02.1991

[emkunyavskaya@list.ru](mailto:emkunyavskaya@list.ru)

E-VERSION

## EXPERTISE

### PROGRAMMING LANGUAGES

Java Kotlin C Bash VBA SQL

### TECH SKILLS

Spring, j2ee, OkHttp, PostgreSQL, Git, junit, TestNG, Maven, Gradle, Docker, FireBase, Swing, Groovy, Sap, HTML, OpenCl, SDL2, Unix

### KNOWLEDGE

English (Intermediate), French (Pre Intermediate), Jira, Jenkins, Sonar, WildFly, MVP, Rest API

## WORKING PROJECTS

### PARTNER CHANNEL

A system for placing applications by Partners and processing leads from corporate business of subsidiary banks.

### COMPAS

Mobile application for tablets for organizing the work of field managers with key clients.

#### Tasks

- code coverage with uni-tests (testNg, powerMockito, Mockito)
- writing autotests
- handling POST / GET requests in code
- connection of the jetty server,
- project assembly, uploading to the server from Wildfly
- setting up jenkinsJob to upload new library to Nexus
- update of integration adapters
- coding additional options (product filtering, new product parameters, etc.)
- creating "reference books" (rolling using liquibase), connecting and working with "reference books" in the code (sql injections)
- bugfixing
- refactoring

## C PROJECTS

### LS

An analogue of the basic function ls. The following flags are implemented: -R, -l, -a, -C, -r, -t, -1; and correct output to file. Folder traversal is implemented by recursion. Sorting is done by the merge method. To optimize speed, the output to the screen is implemented with one write.

The work was carried out in a team of two people.

### FRACTOL

Visualization of various fractals: Carpet, Julia, Mandelbrot, Mandelbar, Burning Ship, Celtic Mandelbrot, Celtic Mandelbar

In the program from the keyboard, you can select: fractal type, color scale, number of display iterations. Also, using the mouse, you can zoom in on the image at any point.

For speed optimization pthreads are used. Graphics library: mlx.

### RTV1/RT

The project consists of two stages:

1. Reading scene from file in xml / json format is implemented and the drawing of figures on the "scene" is mathematically calculated. (performed single-handedly)
2. Visual effects, like drawing pictures on shapes, cropping shapes, reading and drawing polygonal objects, path-tracing, anti-aliasing is implemented. (team work)

## EDUCATION

### Programming school 21 (Ecole42)

2019 - 2022 Moscow

### Novosibirsk State University

Bachelor degree  
Faculty of Mechanics and Mathematics.(Applied math)

2008 - 2012 Novosibirsk

## WORK EXPERIENCE

- 2020 JUN- Sberbank development engineer; present
- 2018 - 2020 freelance translations, tutoring;
- 2014 - 2018 Sberbank HR analyst;
- 2012 - 2013 Bank Trust Comp.&Benefits specialist;
- 2012 (APR - GK Rolf HR analyst; AUG)
- 2010 (JUN - Bank Intern in financial SEP) "Interaction" department.

## JAVA PROJECTS

### TIC TAC TOE

The classic game of tic-tac-toe, implemented a visual interface (Swing library) and the option to select an opponent - a person / computer. In computer mode, the probability of winning in each cell is calculated, the cell with the highest probability is selected.

### SIMPLE ENGINE SEARCH

Easy telephone directory. Search in a file structured like a notebook. The program indexes the transmitted data, which speeds up the search. Also in the program you can choose different strategies for data output.

### BUDGET MANAGER

Program for budgeting. Loading data from a file and adding costs to different categories are implemented. You can also sort and view data by different categories.

### DOG DOCS

Android application (in Java) for storing information about a pet (dates of vaccinations, protection against ticks)  
The application implements uploading photos, calendar and reminders with the selected frequency. The data is stored inside the application (db h2).

### FT HANGOUTS

Android application (in Java) stores the contacts with photos, sends and receives messages.
