I'm an aspiring Android developer with 2 years of experience in Java and 6 months in Android. I graduated with a degree in mathematics and finished an intensive 2 year coding bootcamp. I have implemented several development projects in C, before diving into high-load Java development at a huge Russian bank. I've always liked automating my tasks, which inspired me to write my own app on Android and further develop in this sphere. All in all, I'm well-versed in algorithms and data structures. I am a self-starter, as well as a team player (School 21 does that to anyone, as well as Sberbank - it's a big, yet fast-paced, family). I'd love to dive deeper into full-stack Android development, not shunning modern tech and frameworks.

EXPERTISE

PROGRAMMING LANGUAGES	TECH SKILLS
Java Kotlin C Bash VBA SQL	Spring, j2ee, OkHttp, PostgreSQL, Git, jUnit, TestNG, Maven, Gradle, Docker, FireBase, Swing, Groovy, Sap, HTML, OpenCl, SDL2, Unix

WORK EXPERIENCE

- 2021 - 2022 Telemessage (Israel) android developer;

CHAT (TELEMESSAGE)
Messenger with additional security options and data storage on the server.

Tasks
- adding a delayed message option
- code coverage with uni-tests (Junit, powerMockito, Mockito)
- bugfixing

- 2019 - 2021   Sberbank development engineer;

PARTNER CHANNEL (SBERBANK)
A system for placing applications by Partners and processing leads from corporate business of subsidiary banks.

COMPAS (SBERBANK)
Mobile application for tablets for organizing the work of field managers with key clients.

Tasks
- coding additional options (product filtering, new product parameters, etc.)
- handling POST / GET requests in code
- setting up jenkinsJob to upload new library to Nexus
- code coverage with uni-tests (testNg, powerMockito, Mockito)
- project assembly, uploading to the server from Wildfly, connection of the jetty server
- update of integration adapters
- creating "reference books" (rolling using liquibase), connecting and working with "reference books" in the code (sql injections)
- bugfixing, refactoring

PET PROJECTS

DOG DOCS
Android application (in Java) for storing information about a pet (dates of vaccinations, protection against ticks)
The application implements uploading photos, calendar and reminders with the selected frequency. The data is stored inside the application (db h2).

FT HANGOUTS
Android application (in Java) stores the contacts with photos, sends and receives messages.

SIMPLE ENGINE SEARCH
Easy telephone directory. Search in a file structured like a notebook. The program indexes the transmitted data, which speeds up the search. Also in the program you can choose different strategies for data output.

BUDGET MANAGER
Program for budgeting. Loading data from a file and adding costs to different categories are implemented. You can also sort and view data by different categories.

EDUCATION

Programming school 21 (Ecole42)

Novosibirsk State University
Bachelor degree
Faculty of Mechanics and Mathematics.(Applied math)

KNOWLEDGE

English (Intermediate),   French(Pre Intermediate).
Jira,   Jenkins,   Sonar,   WildFly,   MVP,   Rest API
